Contents

1 To Test or Not to Test 1
1.1 Testing History – More than 2000 Nuclear Explosions 2
1.1.1 China 3
1.1.2 France 4
1.1.3 India 5
1.1.4 North Korea 5
1.1.5 Pakistan 5
1.1.6 Soviet Union 6
1.1.7 United Kingdom 6
1.1.8 USA 7
1.2 Nuclear Weapons – With and Without Testing 9
1.2.1 Why Testing? 9
1.2.2 Global Nuclear Capabilities 10
1.2.3 Nuclear Weapons Without Testing 11
1.3 Why a Comprehensive Nuclear-Test-Ban Treaty? 14
1.4 Related Nuclear Arms Control and Disarmament Treaties 15

Box 1 What Is a Nuclear Device? **18**

2 Monitoring Technologies 25
2.1 Nuclear Explosions – Detectable Features 25
2.2 Detection, Location and Identification 26
2.2.1 Detection 27
2.2.2 Event Location 30
2.2.3 Event Identification 32
2.2.4 New Developments 34
2.3 Seismological Monitoring 35
2.3.1 Seismology and Earthquakes 35
2.3.2 Seismic Waves and Wave Propagation 38
2.3.3 Seismological Stations and Networks 39
2.3.4 Seismology and Nuclear Explosions 40

2.4 Hydroacoustic Monitoring 42
2.4.1 The SOFAR Channel 42
2.4.2 Detecting the Signals 43
2.4.3 Locating Events 43
2.4.4 What do We Observe? 44
2.5 Infrasound Monitoring 44
2.5.1 What Is Infrasound? 44
2.5.2 Detecting Signals 45
2.6 Radionuclide Monitoring 47
2.6.1 Particles and Noble Gases 47
2.6.2 Particle Detection at CTBT Monitoring Stations 48
2.6.3 Detection of Noble Gases at CTBT Monitoring Stations 49
2.6.4 Tracking the Source 50
2.7 Detection from Space 50
2.8 Enabling Technologies 52
2.8.1 Computer Hardware and Software 52
2.8.2 Communications 53
2.8.3 Satellite Observations 53
2.8.4 Revolution in Information Analysis 54

Box 2 Array Stations 55

3 A Long Journey to a Treaty 59
3.1 Past Test Ban Initiatives 59
3.1.1 First Efforts 60
3.1.2 The Five 60
3.1.3 The Trilaterals 61
3.1.4 The Partial Test Ban Treaty 62
3.1.5 The Threshold Test Ban Treaty 63
3.2 Group of Scientific Experts 64
3.2.1 The Initial Design 65
3.2.2 The First GSE Test 66
3.2.3 The Second Test – Moving into the Digital Era 66
3.2.4 GSETT-3: Approaching a Verification System 67
3.2.5 GSE – Successful Preparatory Work 68
3.3 The CTBT Negotiations 1994–96 69
3.3.1 Starting the Negotiations 71
3.3.2 1995 – Waiting in the Hallway 72
3.3.3 1996 – The Endgame 73
3.4 Critical Issues During the Negotiations 74
3.4.1 The Preamble 74
3.4.2 The Organization 75
3.4.3 Verification 75
3.4.4 Entry into Force (EIF) 77

3.5 Reflections on the Negotiations 77
3.5.1 GSE a Tool to Get Prepared 78
3.5.2 CD a Bottleneck? 79

4 The Treaty 83
4.1 The Preamble 83
4.2 Basic Obligations 84
4.3 The Organization 85
4.3.1 The Conference 85
4.3.2 The Executive Council 86
4.3.3 The Technical Secretariat 87
4.4 Verification 87
4.4.1 The International Monitoring System 87
4.4.2 Consultation and Clarification 89
4.4.3 On-Site Inspections 90
4.4.4 Confidence-Building Measures 91
4.5 National Implementation Measures 91
4.6 Entry into Force 92
4.7 Reflections 93
4.7.1 Politically Significant 93
4.7.2 The Executive Council 94
4.7.3 The Role of CTBTO and States Parties 95
4.7.4 An Unprecedented Verification Regime 96
4.7.5 Verification, Too Little or Too Much? 97

5 The Birth of An Organization 99
5.1 The Mandate of the CTBTO Preparatory Commission 99
5.2 Preparations for the First Session of the CTBTO Preparatory Commission 101
5.3 The First Session of the CTBTO Preparatory Commission 102
5.4 The Initial Enthusiasm 106
5.5 The Early Challenges 108

6 Establishing the Verification Regime 113
6.1 A Complex Monitoring System in a Political Environment . . . 113
6.2 Building the Monitoring System – A Gradual but Slow Process 127
6.2.1 Political, Cost and Capacity Factors 127
6.2.2 Technical and Administrative Aspects 129
6.2.3 IMS and IDC Status Overview 131
6.3 Some Specific IMS Issues 133
6.3.1 Station Specifications and Certification Procedures 133
6.3.2 Auxiliary Seismic Stations 134
6.3.3 Infrasound Stations 136

6.3.4 Noble Gas Stations 136
6.3.5 Cooperating National Facilities 137
6.3.6 IMS Station Coordinates 137
6.4 On-Site Inspections a Politicized Issue on a Slow Path 138

7 Testing Shows High Performance 143
7.1 From Building to Testing 143
7.1.1 Mode of Operation of the Global Monitoring System . . 143
7.2 Global Tests Show High Performance of IMS/IDC 146
7.2.1 Technology Works 146
7.2.2 Monitoring Capabilities Foreseen During the CTBT Negotiations 146
7.2.3 Current Capabilities and Projections for the Completed System 150
7.2.4 Tests of the Monitoring System Provided by Nuclear and Other Explosions 161
7.2.5 Assessment of Eventual IMS/IDC Capabilities; Room for Further Improvements 166
7.3 Exercises Also Get OSI on the Move 169

8 National Technical Implementation of the CTBT 173
8.1 National Commitments 173
8.2 National Institutions Play Key Roles in the Global Verification System 174
8.3 Basis for National Interpretation 176
8.4 Regional Cooperation 178
8.5 An Assessment of the Status of National Technical Implementation 180

9 The CTBTO Preparatory Commission and the PTS – an Organizational Perspective 183
9.1 The Policy Making Organs 183
9.1.1 The Structure of the Policy Making Organs 183
9.1.2 The PrepCom Plenary Body 185
9.1.3 The Working Groups 186
9.1.4 Executive Secretary's Two Faces 187
9.1.5 How did it Work Out? 188
9.2 Provisional Technical Secretariat (PTS) 189
9.2.1 The First Step 190
9.2.2 A "Family" Turning into an Organization 191
9.2.3 Evaluations Push for Better Coordination 191
9.2.4 Rules and Regulations 193
9.2.5 Staffing and the Seven-Year Service Limit 195
9.3 Changing the Guard 197
9.3.1 Reorganizing the PTS 198

10 The CTBTO Preparatory Commission and the World 201
10.1 States Signatories, the CTBTO Preparatory Commission and the PTS 202
10.1.1 States are the Masters of Implementation 202
10.1.2 States are Providing – and Getting – Money 203
10.1.3 States Provide the Personnel to the PTS 206
10.1.4 States are PTS Customers 210
10.1.5 States are the Hosts of Monitoring Stations and Radionuclide Laboratories 210
10.2 The CTBTO Preparatory Commission and International Organizations 211
10.2.1 Organizations in Vienna 211
10.2.2 International Humanitarian Organizations 212
10.2.3 Other International Organizations and Civil Applications 213
10.3 Synergy with Science 215
10.4 The CTBT – Hostage to Today's Politics 220

11 Always Too Early to Give Up 223
11.1 Finally a CTBT – and Then? A Political Perspective 224
11.2 Most Complex Verification System Ever – a Scientific Perspective 227
11.3 Challenge to Establish a Technical Organization in a Political-Environment – a Managerial Perspective 229
11.4 Bringing the CTBT Back on Track 232
11.5 A New Security Agenda 235
11.5.1 Science in Support of Security 236
11.5.2 Invest in Security 237

Annex 1 239
Primary Seismic Stations 239
Auxiliary Seismic Stations 241
Radionuclide Stations 244
Radionuclide Laboratories 248
Hydroacoustic Stations 248
Infrasound Stations 249

Annex 2 253
Chairpersons of the CTBTO Preparatory Commission 253
Executive Secretaries of the CTBTO Preparatory Commission 254
Chairpersons of Working Group A 254
Focal Points and Friends of the Chair of Working Group A 254
Chairpersons of Working Group B 255

Friends of the Chair of Working Group B 255
Program Coordinators of Working Group B 255
Task Leaders of Working Group B 256
