1. **PREFACE: Veterinary Pharmaceuticals in the Environment** 1
Dr. Keri Henderson, Dr. Joel Coats

2. **Veterinary pharmaceuticals in the environment: an introduction** 3
Keri L.D. Henderson, Joel R. Coats

Fate and bioavailability

3. **A Review of the Fate of Manure-Borne, Land-Applied Hormones** 11
H. Hakk, F.X.M. Casey, Z. Fan, G. L. Larsen

4. **Fate of Chlorate Salts Excreted from Animals** 27
D. J. Smith, C. E. Oliver, H. Hakk, R. C. Anderson, G. L. Larsen

5. **Influence of MnO_2 on the transformation of oxy- and chlortetracycline in pond water** 45
Kennedy F. Rubert IV, Curtis J. Hedman, Tan Guo, Joel A. Pedersen

6. **Comparative Biotransformation of Fluoroquinolone Antibiotics in Matrices of Agricultural Relevance** 67
Heinz-Georg Wetzstein, Josef Schneider, Wolfgang Karl

7. **Environmental fate and chemistry of a veterinary antibiotic—tylosin** 93
Dingfei Hu, Keri L.D. Henderson, Joel R. Coats

8. **An overview of the fate and effects of antimicrobials used in aquaculture** 105
Yong-Hak Kim, Carl E. Cerniglia

9. **Fate and bioavailability of sulfamethazine in freshwater ecosystems** 121
Keri L.D. Henderson, Thomas B. Moorman, Joel R. Coats

Assessing potential environmental impacts

10. Livestock Hormones in Aquatic Ecosystems **135**
Yue-wern Huang, Dev K. Niyogi, Paul K. Nam, Janet M. Bandeff

11. Characterization of Chlortetracycline-induced Glutathione *S*-Transferase to Conjugate Chloroacetanilide and Chlorotriazine Herbicides **153**
Michael H. Farkas, James O. Berry, Diana S. Aga

12. Targets, Effects and Risks in Aquatic Plants Exposed to Veterinary Antibiotics **169**
Richard A. Brain, Keith R. Solomon, Bryan W. Brooks

13. Risks of agricultural pharmaceuticals in surface water systems and soils **191**
Keith R. Solomon, Derek G. Hillis, Linda Lissemore, Paul K. Sibley

14. Risk assessment considerations for veterinary medicines in aquatic ecosystems **205**
Bryan W. Brooks, Richard A. Brain , Duane B. Huggett, Gerald T. Ankley
