1 Overview 1
Why I Wrote the Basics of Process Mapping 1
Key Features of Each Map: A Preview of What's Coming 3
What Constitutes a "Key" Feature? 3
What Is a Relationship Map? 4
Key Features of Relationship Maps 4
What Is a Cross-Functional Process Map or Swimlane Diagram? 6
Key Features of Cross-Functional Process Maps 6
What Is a Flowchart? 8
Key Features of Flowcharts 8
Three Views of the Same Work 8
Introduction to Phil's Quick Lube 8
Overview of an Oil Change: Work Sequence 10
Organization View of Oil Change 12
Workflow View of Oil Change 14
Activity View of Oil Change 16

2 Thinking about Work 21
Overview 21
What Is Work? 22
Why (How We Define Work) Matters 22
What Is a Work Component? 22
Examples of Work Components 23
Why Work Components Matter 24
What Is a Work Boundary? 24
Example of Selected Work Boundaries 24
Why Work Boundaries Matter 25
What Is a Work Feature? 25
Example of Work Features 25

Why Features Matter 25
What Is Work Property? 25
Example of Selected Work Properties 26
Why Work Properties Matter 26
(Process) Maps Are Models of Work 26
What Is (Work Viewed as) a Process? 26
What Is (Work Viewed as) a Workflow? 27
What Is "Flow?" 28
What Is (Work Viewed as) a Value Stream? 28
Some Assumptions Regarding Work 28

3 Why Map a Process? 31
Overview 31
Why Map a Process? 31
Reasons to Map a Process (Part 1) 32
Reasons to Map a Process (Part 2) 33
How Do the Two Lists of Reasons Compare? 33
What Is a Model? 34
Why Create a Model of *Work?* 34
(Process) Maps as *Models* of Work 35
The Map Is Not the Territory (It Is a *Model* of the Territory) 36
New Types of Maps May Come and Go, but the Work They Represent Will Remain 37

4 Relationship Maps 39
What Is a Relationship Map? 39
Why Use This Type of Map? 39
How to Create a Relationship Map 42
View 1: Order to Delivery ("Why the Business Is Here") 42
View 2: How Does **This** Part "Fit in?" ("You Are Here") 42
Relationship Map Interview 65
Overview 65
Interview 65
Interpreting Relationship Maps 67
Interpreting the Relationship Map View of Phil's Quick Lube 68

5 Cross-Functional Process Map (aka Swimlane Diagram) 73
What Is a Cross-Functional Process Map or Swimlane Diagram? 73
Why Use This Type of Map? 75
A Closer Look at a Swimlane 76
Mapping Conventions 76
How to Create a Cross-Functional Process Map 82

Cross-Functional Process Map Interview 86
Overview 86
Script 86
Interpreting Cross-Functional Process Maps 88
Interpreting the Cross-Functional Process Map of Phil's Quick Lube ... 90

6 Flowchart 93
What Is a Flowchart? 93
Why Use This Type of Map? 95
How to Create a Flowchart 95
Flowchart 99
Overview 99
Interpreting Flowcharts 103
Interpreting the Flowchart for Activity 2 103

7 Seven Principles to Improve Flow 105
Overview 105
I. Background of the Engagement 108
Purpose of the Engagement 108
Improvement Goal (for the "Funding Document Process") 108
Improvement Team's Summary Results 108
How Work Is Organized 109
Work Done at Headquarters 109
Work Done in the Field 110
Improvement Project Team (Team) 110
What Is a Funding Document? 110
Commercial Equivalent 110
II. The Significance of a "Serial" Workflow and "Handoffs" 111
Key Features of a Serial Workflow 111
Features of the Funding Document Workflow 111
Components and Features of Knowledge Work Handoffs 113
Information Inputs 114
Information Technology (IT) Systems 114
The Knowledge Worker 115
What Is "Flow?" 116
III. Seven Principles to Improve the Flow of Knowledge Work 117
Seven Principles for Improving Flow 117
Principle 1: Improve Flow from the Outside In 117
What the Team Learned from the "Outside In" Principle (1) 118
Principle 2: Measure What Matters to the Customer 119

What the Team Learned from the "Measure What Matters" Principle (2) 120
Principle 3: Make the End-to-End Flow Visible 124
What the Team Learned from the "Make the Flow Visible" Principle (3) 124
Principle 4: Identify and Remove Barriers to Flow 127
What Is Waste? 127
What Is a *Barrier to Flow*? 128
What the Team Learned from the "Remove Barriers to Flow" Principle (4) 131
"The 0.05 to 5 Rule" 132
The 0.05 to 5 Rule Applied to the Funding Document Process 132
Barriers to Flow the Team Identified 133
Problematic Components and Features of Knowledge Work 133
Problematic Features of Workflow Design 133
Team's Selected Findings Due to Workflow Design 134
Problematic Features of Information Systems 134
Team's Selected Findings Due to Information Systems 135
Problematic Features of Motivation and Measurement 135
Team's Selected Findings Due to Motivation and Measurement 136
Problematic Features of Human Resources 136
Team's Selected Findings Due to Human Resources 136
Problematic Featues of Policies and Rules 137
Team's Selected Findings Due to Policies and Rules 137
Problematic Features of Facilities 137
Team's Selected Findings Due to Facilities 138
What the Team Learned from the "Remove Barriers to Flow" 138
What is a Countermeasure? 139
Principle 5: Connect and Align Value-Creating Work Activities 139
What the Team Learned from the "Connect Value Creating Activities" Principle (5) 140
Principle 6: Organize around the End-To-End Flow 141
What the Team Learned from the "Organize Around Flow" Principle (6) 142
Principle 7: Manage the Flow Visually 143
What the Team Learned from the "Manage Visually" Principle (7) 143

Appendix **145**
Overview of Chapter Content 145
Five Methods 145
Method 1: Self-Generate 145
Method 2: One-on-One Interviews 146
Method 3: Group Facilitation 146
Method 4: Content (Document) Review 147
Method 5: Observation 147
Guidelines for a Mapping Work Session 148
Before Beginning the Mapping Work Session 148
Provide a Clear and Compelling Goal for Creating the Map 148
Select the Right People to Get in the Room (the Natural Work Group) 148
Provide Handouts Showing Naming Conventions and Example Action Verbs 148
Provide "Just in Time" Learning 149
Always Walk the Process 149
Establish Ground Rules Up-Front and Post Them on a Flipchart 149
Use a Room Large Enough so That People Can Easily Move Around 149
Keep a Kit of Supplies Handy, Include Plenty of "Wall" Paper to Write on 149
Use the Natural Workgroup, along with the Observation and Group Facilitation Methods 150
During the Mapping Work Session 150
Use "Sticky Notes" to Generate Initial Activities, Etc. 150
Arrange the Sticky Notes into an Initial Layout of the Process 150
Make Multiple Passes through the Work Sequence as Needed, in Light of the Goal for Creating the Map 150
Keep a Steady Pace, Monitor Participation and Group Dynamics 150
After the Mapping Work Session is Completed 151
Document the Map 151
How to Create a Relationship Map 152
How to Create a Cross-Functional Process Map 162

Index 169
