Introduction V

PART I. Introduction

Chapter 1. Biotechnology Impacting Cosmetic Science: Altering the Way Cosmetics Are Perceived?, *Kostarelos* 1

Chapter 2. Advances in Phytochemistry: Rx and Non-Rx, *Leaders* 7

Chapter 3. Novel Approaches for Molecular Biology and Skin Care Products, *Benson* 13

Chapter 4. Dermagenetics, *Gruber and O'Brien* 21

PART II. Biotechnology and the Skin

Chapter 5. Pathways for Skin Penetration, *Dayan* 29

Chapter 6. Quantifying Skin Relaxation and Well-Being, *Mas Chamberlin et al.* 43

Chapter 7. Who is Mast T. Langerhans?, *Herman* 53

Chapter 8. Neuroimmunological Activities of Keratinocytes, *Brenci et al.* 57

Chapter 9. Metalloproteinase Inhibitors, *Thibodeau* 69

Chapter 10. Advances in Stratum Corneum Biology and Understanding of Dry Skin, *Rawlings* 81

Chapter 11. Advances in Dry Skin Stratum Corneum Biology and Moisturization, *Rawlings* 93

PART III. Biotechnology and Aging

Chapter 12. Extracellular Matrix and Aging: A Review of Mechanisms and Interventions, *Robert* 107

Chapter 13. Wrinkle Free and Beyond, *Newman* 125
Chapter 14. Delivering on Antiaging Potential, *Jeffries* 129
Chapter 15. Pollution and Aging: Antioxidants for Skin, *Nicolaÿ & Paillet* ... 135
Chapter 16. Pep Talk: Slowing Down Aging, Owen 147
Chapter 17. Peptides in the Pipeline for Antiaging, *Brewster* 151
Chapter 18. A New Sodium Hyaluronate For Skin Moisturization and Antiaging, *Guillaumie et al.* 159
Chapter 19. Antiaging Effects of a Skin Repair Active Principle, *Rigano et al.* 169
Chapter 20. Strategies of Antiaging Actives in Sunscreen Products, *Mas Chamberlin et al.* 181
Chapter 21. Actives Activate Skin Care Market, *Jeffries* 199

PART IV. Biotechnological Developments in Ingredients

Chapter 22. Super Naturals, *Rosen* 205
Chapter 23. Peroxide-Inducible Protective Factors Produced by Saccharomyces cerevisiae, *Lods et al.* 217
Chapter 24. Chitosan in Cosmetics: Technical Aspects When Formulating, *Juneau et al.* 225
Chapter 25. Octadecenedioic Acid for a More Even Skin Tone, *Wiechers et al.* 239
Chapter 26. Rhizobium Gum: A Novel Cosmetic Ingredient from Soil to the Skin, *Bresin et al.* 257
Chapter 27. Protecting the Skin from Environmental Stresses with an Exopolysaccharide Formulation, *Thibodeau* 267
Chapter 28. Examining an Exfoliation-Promoting Enzyme for Cosmetic Applications, *Seki et al.* 285

SECTION A. From the Sea

Chapter 29. Manufacturing Microalgae for Skin Care, *Stolz and Obermayer* 301

Chapter 30. Targeting Deep-Sea Microorganisms for Discovering New Polysaccharides, *Thibodeau* 311

SECTION B. Flavors, Fragrances and Pigments

Chapter 31. Flavors of the Future: Biotechnology, "Intelligent" Flavors and Beyond, *Torrell* 321

Chapter 32. Synthesis and Authentication of Natural Vanillins Prepared by Fermentation, *Desmurs et al.* 329

Chapter 33. The Future of Fragrance: Toward a Biotechnology of Scent Creation, *Elias et al.* 343

Chapter 34. Pigment Ideas from the Animal and Microorganism Kingdoms, *Brewster* 353

PART V. Regulations and Testing in the Biotechnology Age

Chapter 35. "Precautionary" Regulation, Genetics and Cosmeceuticals in the 21st Century, *Redick* 361

Chapter 36. Using Tissue Engineered Skin to Evaluate the Irritation Potential of Skin Care Products, *De Wever and Charbonnier* 371

Chapter 37. ATP Bioluminescence: Detecting Microbial Contamination in Dentifrices, *Jimenez* 387

Index 397
