Preface ix

Editor xi

Contributors xiii

1 Nanobiomaterials: Current Status and Future Prospects 1-1
Pramod K. Avti, Sunny C. Patel, and Balaji Sitharaman

2 Multifunctional Gold Nanoparticles for Cancer Therapy 2-1
Maung Kyaw Khaing Oo, Henry Du, and Hongjun Wang

3 Synthesis, Processing, and Characterization of Ceramic Nanobiomaterials for Biomedical Applications 3-1
Michaela Schulz-Siegmund, Rudi Hötzel, Peter-Georg Hoffmeister, and Michael C. Hacker

4 Synthesis, Properties, Characterization, and Processing of Polymeric Nanobiomaterials for Biomedical Applications 4-1
Theoni K. Georgiou

5 Carbon-Based Nanomedicine 5-1
Michael L. Matson, Jeyarama S. Ananta, and Lon J. Wilson

6 Synthetic and Toxicological Characteristics of Silica Nanomaterials for Imaging and Drug Delivery Applications 6-1
Heather Herd and Hamidreza Ghandehari

7 Peptide-Based Self-Assembled Nanofibers for Biomedical Applications 7-1
Joel M. Anderson, Meenakshi Kushwaha, Dong Jin Lim, and Ho-Wook Jun

8 Electrostatically Self-Assembled Nanomaterials 8-1
Helmut Strey

9 Peptide-Based Nanomaterials for siRNA Delivery: Design, Evaluation, and Challenges 9-1
Seong Loong Lo, Yukti Choudhury, and Shu Wang

10 Nucleic Acid Nanobiomaterials 10-1
Bin Wang

11 Emerging Technologies in Nanomedicine 11-1
F. Kyle Satterstrom, Marjan Rafat, Jin-Oh You, and Debra T. Auguste

12 Nanomaterials for Therapeutic Drug Delivery 12-1
Dinesh Jegadeesan and M. Eswaramoorthy

13 Nanobiomaterials for Nonviral Gene Delivery 13-1
Xiujuan Zhang, Daniel A. Balazs, and W.T. Godbey

14 Nanobiomaterials for Cancer-Targeting Therapy 14-1
Mingji Jin and Zhonggao Gao

15 Nanobiomaterials for Ocular Applications 15-1
Rinti Banerjee

16 Nucleic Acid Based Nanobiosensing 16-1
Nicholas M. Fahrenkopf, Phillip Z. Rice, and Nathaniel C. Cady

17 Nanobiomaterials for Molecular Imaging 17-1
Dian Respati Arifin and Jeff Bulte

18 Gadolinium-Based Bionanomaterials for Magnetic Resonance Imaging 18-1
Lothar Helm and Eva Toth

19 Nanostructured Materials for Improved Magnetic Resonance Imaging 19-1
Hamsa Jaganathan and Albena Ivanisevic

20 Nanobiomaterials for Dual-Mode Molecular Imaging: Advances in Probes for MR/Optical Imaging Applications 20-1
Chuqiao Tu and Angelique Louie

21 Nanoscale Probes for the Imaging of RNA in Living Cells 21-1
Philip J. Santangelo, Aaron Lifland, and Chiara Zurla

22 Nanomaterials for Artificial Cells 22-1
Xiaojun Yu, Elvin Lee, Alicia Vandersluis, and Harinder K. Bawa

23 Nanobiomaterials for Musculoskeletal Tissue Engineering 23-1
Kyobum Kim, Minal Patel, and John P. Fisher

24 Nanocomposite Polymer Biomaterials for Tissue Repair of Bone and Cartilage: A Material Science Perspective 24-1
Akhilesh K. Gaharwar, Patrick J. Schexnailder, and Gudrun Schmidt

25 Collagen: A Natural Nanobiomaterial for High-Resolution Studies in Tissue Engineering 25-1
Brian M. Gillette, Niccola N. Perez, Prasant Varghese, and Samuel K. Sia

26 Nanotopography on Implant Biomaterials 26-1
Edwin Lamers, Frank Walboomers, and John Jansen

27 Nanoarray Bionanotechnology 27-1
Alexandra H. Brozena and YuHuang Wang

28 Photopatternable Multifunctional Nanobiomaterials 28-1
Hailin Cong and Tingrui Pan

29 Nanobiomaterials for Preclinical Studies and Clinical Diagnostic 29-1
Youssef Zaim Wadghiri and Karen Briley-Saebo

30 Biocompatibility of Nanomaterials: Physical and Chemical Properties of Nanomaterials Relevant to Toxicological Studies, In Vitro and In Vivo 30-1
Christie Sayes and J. Michael Berg

31 Hemocompatibility of Nanoparticles 31-1
Shankar J. Evani and Anand K. Ramasubramanian

32 Breaking the Carbon Barrier: Nanobiomaterials and Communal Ethics 32-1
David M. Berube

Index **Index-1**
