1. INTRODUCTION AND RATIONALE ixx
1.1 Introduction ixx
1.2 Study Rationale 3
1.3 Scope 4

2 ENERGY RESOURCE BASE, SUPPLY AND DEMAND 5
2.1 Energy Resources Availability 5
2.1.1 Coal 5
2.1.2 Coal Bed Methane 5
2.1.3 Biomass 6
2.1.3.1 Fuel wood 6
2.1.3.2 Forestry residues 6
2.1.3.3 Urban waste 6
2.1.3.4 Energy Crops 6
2.1.3.5 Biogas 6
2.1.4 Solar 7
2.1.5 Wind 7
2.1.6 Hydropower 7
2.1.7 Nuclear 8
2.1.8 Liquid Fuels 8
2.2 Energy Consumption Patterns 8
2.2.1 Fuel wood 9
2.2.2 Coal 9
2.2.3 Electricity 10
2.2.4 Liquid Fuels 11
2.2.5 New and Renewable Energy Sources 11
2.3 Energy Demand Projections 12
2.3.1 Methodology 12
2.3.2 Scenarios Driving Energy Demand in Zimbabwe 13
2.3.2.1 Energy demand forecast by type of energy 14
2.3.2.2 Energy demand forecast by economic activity 15
2.3.2.3 Energy demand projections for liquid fuels 15
2.3.2.4 Coal and Coke Demand Forecast 16
2.3.2.5 Electricity projected demand 17
2.3.2.6 Traditional fuel demand projections 17
2.3.2.7 Demand projections for solar energy 17

3 ENERGY INFRASTRUCTURE 19
3.1 Electricity 19
3.1.1 Existing and Future Generation Capacity 19
3.1.2 Planning Criteria for Meeting the Generation Capacity 20
3.1.3 Options for Meeting the Generation Capacity Needs 21
3.1.3.1 Kariba South Expansion 21
3.1.3.2 Expansion of Hwange Power Station 21
3.1.3.3 Batoka Gorge Hydro Power Plant 21
3.1.3.4 Lupane Coal Bed Methane 21
3.1.3.5 Gokwe North Project 22
3.1.4 Development Options 22
3.1.5 Alternative Options for Meeting Future Electricity Demand 22
3.1.5.1 Justification of renewable energy sources 22
3.1.5.2 Typical renewable energy technologies for Zimbabwe 24
3.1.6 Energy Efficiency and Demand Side Management 28
3.1.6.1 Background and benefits 28
3.1.6.2 Potential for energy saving in Zimbabwe 29
3.1.6.3 Barriers towards implementation of DSM in Zimbabwe 29
3.1.7 Options for meeting the grid requirements 30
3.1.7.1 Current transmission and distribution infrastructure 30

3.1.7.2 Transmission system rehabilitation . . . 31
3.1.7.3 New 330kV bulk supply points . . . 31
3.1.7.4 Sub-transmission network upgrading and expansion . . . 31
3.1.7.5 Supplies to Matabeleland Zambezi Water Project . . . 31
3.1.7.6 Distribution system development, maintenance constraints and financing gap . . . 31
3.2 Liquid Fuels . . . 32
3.2.1 Petroleum Refining . . . 32
3.2.2 Production of Ethanol . . . 32
3.2.3 Ethanol Gel . . . 32
3.2.4 Bio-diesel . . . 32
3.2.5 Energy Substitution . . . 33
3.2.6 Energy Efficiency . . . 33
3.3 Coal Sector . . . 33
3.3.1 Capturing Carbon Dioxide . . . 33
3.3.2 Gasification Processes . . . 34
3.3.3 Coal Conversion to Ammonia and Liquid Fuels . . . 34
3.3.4 Coal Bed Methane . . . 34
3.4 Biomass Sector . . . 34
3.4.1 Biogas . . . 34
3.4.2 Fuel Wood Conservation through Improved Woodstoves . . . 34
3.4.3 Forest Control Measures . . . 35
3.4.4 Fuel Switching Options . . . 35

4 FRAMEWORK FOR SUSTAINABLE INVESTMENT IN THE ENERGY SECTOR . . . 37
4.1 Investment Barriers in the Energy Sector . . . 37
4.2 Support of Private Sector Investments in the Energy Sector . . . 37
4.2.1 Lack of Capital . . . 37
4.2.2 Supply Inefficiencies . . . 37
4.2.3 Persistent Poverty . . . 38
4.2.4 Utility Debt . . . 38
4.3 Financing Model of the Energy Sector . . . 38
4.3.1 Management Contracts . . . 38
4.3.2 Affermage/Leases . . . 39
4.3.3 Concessions . . . 39
4.3.4 Project Financing . . . 39
4.3.5 Sale/Leaseback . . . 39
4.3.6 Divestitures . . . 39
4.4 Appropriate Frame Work for Private Sector Financing of the Energy Sector . . . 39
4.4.1 Macro-Economic Framework . . . 39
4.4.2 Energy Sector Market Framework . . . 40
4.4.3 Financial Markets Framework . . . 40
5 CONCLUSIONS AND RECOMMENDATIONS . . . 41
5.1 Electricity Sector . . . 41
5.2 Petroleum Sector . . . 42
5.3 Coal Sector . . . 43
5.5 Investment . . . 44
