# Table of Contents

## Invited Papers

- Attacking Large Industrial Code with Bi-abductive Inference .......................... 1
  Dino Distefano

- On a Uniform Framework for the Definition of Stochastic Process Languages ......................................................... 9
  Rocca de Nirella, Diego Latella, Michele Loreti, and Micka Muesauk

- Applying a Formal Method in Industry: A 15-Year Trajectory .......................... 26
  Thierry Lecomte

- What’s in Common between Test, Model Checking, and Decision Procedures? ........ 35
  Ken L. McMillan

## Contributed Papers

- Verifying Cryptographic Software Correctness with Respect to Reference Implementations ................................................. 37
  José Barceló Almeida, Manuel Barbosa, Jorge Sousa Pinto, and Bárbara Vieira

- Towards an Industrial Use of FLUCTUAT on Safety-Critical Avionics Software .......................................................... 53
  David Delmas, Eric Guimbard, Sylve Patot, Jean Sengris, Karim Tekkal, and Franck Veldrice

- Dynamic State Space Partitioning for External Memory Model Checking .................. 70
  Sami Evangelista and Lars Michael Kristensen

- Compositional Verification of a Communication Protocol for a Remotely Operated Vehicle .................................................. 86
  Alejandro G. Goulart and César A. Mañas

- Modeling Concurrent Systems with Shared Resources ........................................ 102
  Ángel Herruzo, Julio Martino, Manuel Carriz, and Juan José Monroy Navarro

- Platform-Specific Restrictions on Concurrency in Model Checking of Java Programs ......................................................... 117
  Pavel Pavřízek and Tomas Kalibera
Table of Contents

Formal Analysis of Non-determinism in Verilog Cell Library Simulation Models
Matthias Raffelsieper, MohammadReza Mousavi, Jan-Willem Roorda, Chris Stroelenberg, and Hans Zantema

Preemption Abstraction: A Lightweight Approach to Modelling Concurrency
Erik Schierboom, Alejandro Tamalet, Hendrik Teun, Marko van Eckelen, and Sjaak Smetsers

A Rigorous Methodology for Composing Services
Kenneth J. Turner and Koon Leai Larry Tan

A Certified Implementation on Top of the Java Virtual Machine
Janvier de Dios and Ricardo Peña

Selected Posters

Formal Development for Railway Signaling Using Commercial Tools
Alessio Ferrari, Alessandro Fantechi, Stefano Bacherini, and Niccolò Zingoni

Integrated Formal Approach for Qualified Critical Embedded Code Generator
Nassima Izerrouken, Marc Pantel, Xavier Thirioux, and Olivier Szi Yan Kai

Visualising Event-B Models with B-Motion Studio
Lukas Ladenberger, Jens Benesposto, and Michael Leuschel

Behavioural Analysis of an LCD Linux Driver
Dragan Bošnački, Aad Mathijssen, and Yaroslav S. Usenko

Model-Based Testing of Electronic Passports
Wojciech Mostowski, Erik Poll, Julien Schmalitz, Jan Tretmans, and Rommy Wicher Schrew

Developing a Decision Support Tool for Dam Management with SPIN
María-del-Mar Gallardo, Pedro Merino, Laura Pantzo, and Antonio Linares
