Preface and Acknowledgments	xiii
Introduction	1
California's Failing Water Policy	2
Consequences of Inaction	8
From Conflict to Reconciliation	9
Overview of This Book	12
Part I California Water: Turbulent Past, Chaotic Present, Changing Future	15
Chapter 1 Floods, Droughts, and Lawsuits: A Brief History of California Water Policy	19
California's Native Waterscape	20
Spanish and Mexican Influences	21
The Laissez-Faire Era of Water Development	22
The Era of Local Organization	26
The Hydraulic Era	33
The Era of Conflict	56
An Era of Reconciliation?	68
Chapter 2 California Water Today	71
Water Availability	72
Uses and Value of Water	86
Flood Vulnerability and Flood Management Infrastructure	103
Water System Management and Finance	107
Scientific and Technical Support for Decisionmaking	127
Strengths and Weaknesses in Today's Water System	133
Chapter 3 Drivers of Change	135
Climate Change	137
Deterioration of the Water System	150
Economic and Demographic Conditions	162

Changing Ecosystems	167
Scientific and Technological Progress	170
Seemingly Inevitable Changes	175
Part II New Directions for a Changing Future	179
Chapter 4 Urgent and Fundamental Challenges	183
Five Areas in Need of Strategic Reform	185
Pathways Forward	195
Chapter 5 Reconciling Ecosystems: Reversing Declines in Native Species	199
Fish Versus Water Supply: The Fish Are Losing	200
Bringing Fish into Water Management: Ecosystem Services	206
General Strategies for Recovering Freshwater Biodiversity	209
A Systematic Approach to Protecting Aquatic Biodiversity in California	214
Reconciling the Delta	218
Reconciliation Strategies	219
Reconciliation and Environmental Laws	238
Managing with Uncertainties	247
Working Toward Reconciliation	249
Chapter 6 Orchestrating the Management of Water Scarcity, Quality, and Flooding	253
Orchestrating Activities Through Portfolio-Based Planning	254
The Water Supply Portfolio	255
The Water Quality Portfolio	280
The Flood Management Portfolio	290
Portfolios Across Sectors: Integrated Water Management	307
Information and Analysis: What Needs to Improve?	307
Priorities for Portfolios in Water Management	311
Chapter 7 Managing Water as a Public Commodity	315
Water as a Public Commodity: The Legal Framework	317
Harmonizing Water Rights Administration	322
Strengthening Water Transfer Law	331
Modernizing California's Water Grid	337
Assuring Funding for Public Benefits	343
Treating Water as a Public Commodity	347

Part III Making Reform Happen	349
Chapter 8 Effective and Adaptive Governance	353
Information, Expertise, and Resources	353
Integration and Coherence	358
Decisionmaking	368
Adaptive Capacity	371
Improving Water Governance	373
Chapter 9 Pathways to Reform	375
Waiting Can Be Costly	376
New Laws Are Often Unnecessary	378
Mandating and Nudging Local Action	386
Facilitating Transition Costs	396
Promoting Reforms	404
Achieving Reforms	409
Chapter 10 A Way Forward	411
Major Crises Await	411
Failing Governance Institutions	414
Promising Directions for Water Policy	414
Facilitating and Sequencing Reform	425
Acting Now to Avert Crisis	427
Glossary	429
