SECTION 2: MASS SPECTROMETRY ANALYSIS OF FOOD INGREDIENTS

Chapter 2 Mass Spectrometry for Food Analysis: The Example of Fat Soluble Vitamins A and K
Gregory G. Dobnikowski

Chapter 3 Mass Spectrometry for the Analysis of Milk Oligosaccharides
Daniel Kolarich and Nicolle H. Packer

Chapter 4 Mass Spectrometry in Protein, Peptide and Amino Acid Analysis
Claudio Corradini, Lisa Elviri and Antonella Cavazza

Contents

4.3 Gel-based Proteomics 80
4.4 Liquid Chromatography and Mass Spectrometry in Proteomics 82
4.5 Quantitative Proteomics 83
4.6 Protein-Peptide Related Food and Nutritional Applications
   4.6.1 Plant Proteins 86
   4.6.2 Dairy Proteins and Bacteria 87
   4.6.3 Technology Complementarities 87
   4.6.4 Protein Processing 88
   4.6.5 Proteolysis and Ripening 89
   4.6.6 Proteins in Food Technology 90
   4.6.7 Low-abundant Milk Proteins 91
4.7 Food-borne Microorganisms and their Fermenting Effects on the Food Proteome 91
4.8 Food Peptidomics 92
4.9 ACE Inhibitors 94
4.10 Antimicrobial and Other Bioactive Peptides 95
4.11 Mass Spectrometry in Food Protein Status and Quality 96
4.12 Conclusions 97
References 98

Chapter 5 Lipidomics and Metabolomics of Dietary Lipid Peroxidation
Arnis Kuksis

5.1 Introduction 102
5.2 Mechanism of Lipid Peroxidation 103
   5.2.1 Free Radical Oxidation 103
   5.2.2 Singlet State Oxygen Oxidation 104
   5.2.3 Biological Lipid Oxidation 106
5.3 Analysis of Lipid Oxidation Products in Food 107
   5.3.1 Methods of Analysis 107
   5.3.2 Oxidation of Dietary Lipids 108
5.4 Bioanalysis of Lipid Oxidation Products 121
   5.4.1 Luminal Degradation and Reduction of Oxo-lipids 121
   5.4.2 Absorption of Oxo-lipids 124
   5.4.3 Oxo-lipids in Plasma, Tissues and Urine 126
   5.4.4 Biological Activity of Oxo-lipids 133
   5.4.5 Exhaustion of Reducing Equivalents 142
5.5 Conclusions 148
Chapter 6 Mass Spectrometry in Phytonutrient Research
Jean-Luc Wolfender, Aude Violette and Laurent B. Fay

6.1 Introduction
6.1.1 Traditional Ingredients (Functional Foods) 165
6.2 Main Classes of Natural Products with Health Benefits
6.2.1 Polyphenols 166
6.2.2 Carotenoids 172
6.2.3 Glucosinolates and Thiosulfinates 174
6.3 Profiling and Analysis
6.3.1 Hyphenated Methods with MS (LC-MS and GC-MS) 177
6.3.2 Direct Use of MS on Complex Mixtures 178
6.3.3 Plant, Fruit or Vegetable Extract Profiling 178
6.3.4 Complementary Analysis by LC-NMR and Related Methods 179
6.3.5 Biofluid Analysis 180
6.4 Analysis of Specific Phytonutrients
6.4.1 Flavonoids, Isoflavones, Anthocyanins 183
6.4.2 Carotenoids 196
6.5 Nutritional Health Benefits
6.5.1 Bioavailability 203
6.5.2 Bioefficacy 208
6.6 Conclusions 223
References 224

SECTION 3: ADDRESSING THE HEALTH ASPECTS OF NUTRITION

Chapter 7 Addressing the Health Beneficial Aspects of Nutrition—The Example of the Obesity Epidemic
Maria Lankinen and Matej Oresic

References 241

Chapter 8 Mass Spectrometry, Diet and Cardiovascular Disease: What will They Mean for Food?
J. Bruce German

8.1 Introduction 244
8.2 Cardiovascular Disease: A Multi-faceted Deterioration of Arterial Structure and Function 246
Chapter 9 Nutrition and Immunity

9.1 The Immune System 268
9.2 Nutrition and Immunity 269
  9.2.1 Macro- and Micronutrients 269
  9.2.2 Malnutrition, Under-nutrition and Immunity 269
9.3 Mass Spectrometry in Immunology–Immunoproteomics 270
  9.3.1 Mass Spectrometry in Immune-related Nutritional Intervention 270
  9.3.2 Mass Spectrometry in Discovery of Immune Markers and Targets 273
9.4 Proteomics of Intestinal Epithelial Cells 274
9.5 Inflammation and Nutrition 276
  9.5.1 Definition of Inflammation 276
  9.5.2 Inflammation and Nutrition 276
  9.5.3 Intestinal Inflammation 278
  9.5.4 Holistic Views of Inflammation 279
  9.5.5 Mass Spectrometry in Inflammation 280
9.6 Allergy and Nutrition 280
  9.6.1 Definition of Allergy 280
  9.6.2 Allergy is a Public Health Issue 281
  9.6.3 Allergy Markers 281
  9.6.4 Food Allergy 281
9.7 Gut Mucosal Immunity, Intestinal Microbiota and Probiotics 283
  9.7.1 Gut Mucosal Immunity 283
  9.7.2 Gut Microbiota 284
  9.7.3 Probiotics 285
  9.7.4 Prebiotics and Synbiotics 286
  9.7.5 Gut Ecology 287
### Contents

**9.8 Early Nutrition and Immunity**
- Immune Development around Birth 288
- Milk as the Ideal Early (Immuno-) Nutrition 289
- Mal-/Under-nutrition and Immune Imprinting 291

**9.9 Mass Spectrometry in the Analysis of Milk**
- Milk and Health 292
- Milk Analytics 292
- Breast Milk and Substitutes 293
- Colostrum 293
- Milk Fat Globule Membrane 294
- Milk Protein Modifications 296
- Cryptomes 297
- Milk Allergens 297
- Human Milk Oligosaccharides 298
- Milk Lipids 298

**9.10 Conclusions**

**References** 300

**Chapter 10 Mass spectrometry, Nutrition and Protein Turnover**
*Michael Affolter*

- Mass Spectrometry and Protein Turnover Analysis 310
- Proteomic Technologies for Protein Turnover Analysis 314

**10.3 Nutrition and Protein Turnover**
- Exercise and Protein Metabolism 319
- Sarcopenia and Protein Metabolism 321

**10.4 Conclusions**

**References** 324

**SECTION 4: CONCLUSION**

**Chapter 11 Conclusion**
*Laurent B. Fay and Martin Kussmann*

**Subject Index** 332
